

Automatic Mechanical Brick Press-Fly Ash & Clay Brick Making Machine

Flyash Bricks

Stabilised Soil Bricks

Clay Bricks

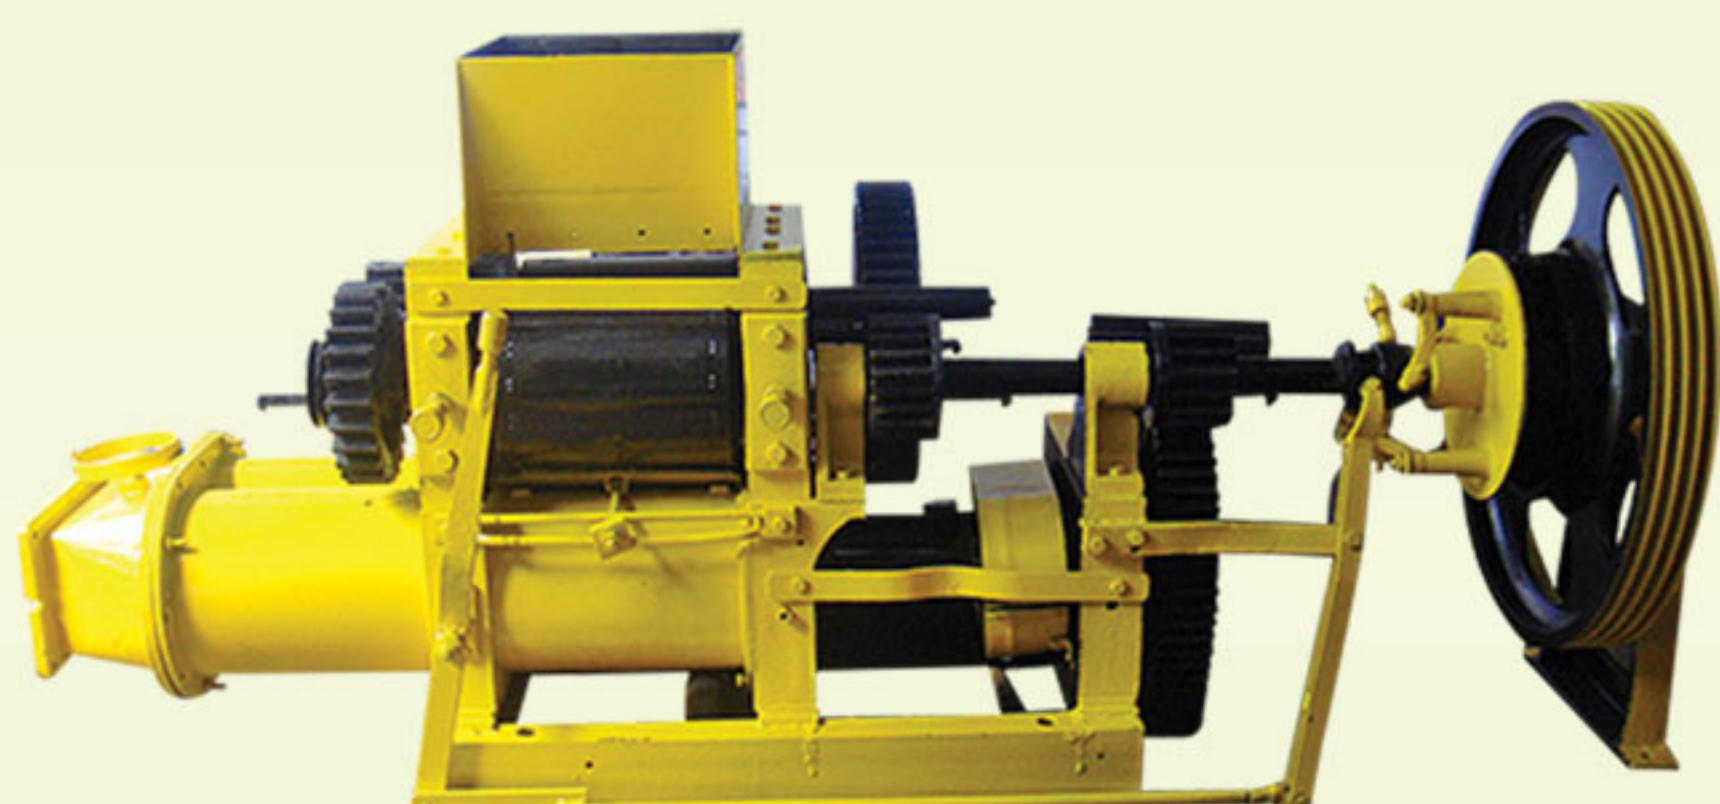

Lakshmi Auto Brick Press :

The Lakshmi Auto Brick Press has an automatic rotating 3-station table: a filling station, a moulding station and an unmoulding or ejection station. Motor power is used for the automatic pressing and ejection of the bricks as well as for the rotation of the table. This machine can produce either compressed earth blocks or clay bricks to be fired in a kiln.

As well as all our other dry pressing equipment, is immediately operational upon arrival on site. Considering its production capacity, the Lakshmi Auto Brick Press has a very low energy consumption: 1 diesel or 2,5 kW per hour, depending on its version. Due to its simple design, only two unskilled workers are required to operate the machine. In order to make the Lakshmi Auto Brick Press a reliable production unit, all mechanical parts have been over dimensioned; a number of safety devices have been installed and all transmission gears are concentrated in a closed casing. Lakshmi Auto Brick Press exists in different versions electrical or diesel.

SPECIFICATION :

CAPACITY : 1000 bricks / hour(L:12"X W:10"x H: 4") 2000 bricks /hour (L: 10"XW: 5"XH: 4")
As per customer requirement size will vary*

POWER: 10 HP Electric or Diesel

Brick Size : Minimum Size -190 x 95 x 100 mm | Maximum Size - 300x 400 x 100 mm

Table : Rotation @ 180` Calm Gear (Automatic)

Raw Material FlyAsh : Fly Ash, Soil, Sand, Lime, Iron, Lime Sludge, Oxide,Quarry Waste etc...

Raw Material feeding : Clay or Ash Mix - Conveyor (or) Manual

Raw Material Moisture :15% Minimum

Machine Size : W: 1200mm x H:1780mm x L: 2600mm

Machine : Stationary or Movable on four Wheels

Weight : 2500 Kgs. (Approximately) **Labour** : 2 Unskilled Labours

Extra Machinery Required For Fly ash and Soil Cement Block: PanMIXture ,Conveyor (optional)
